Summary

Performance-driven **B.Tech** IT student currently **interning at HPE**, with experience in **software development**, **C++**, and full-stack web applications using the **MERN stack**. Strong understanding of **Data Structures**, Algorithms, and **Object-Oriented Programming**, complemented by hands-on project experience. Seeking to contribute to the development of scalable, reliable, and user-focused software systems.

Skills

Programming — C++, C, Python
Databases — MySQL, MongoDB
Systems & Tools — Linux (Ubuntu), Shell Scripting (Bash), QEMU / CXL Emulation
Developer Tools — Git, GitHub, Postman, REST APIs
Web Development — MERN Stack (React, Express.js, Node.js), Tailwind CSS
Core Domains — DSA, OOPs, Database Management System, Computer Networks
Soft Skills — Problem-Solving, Leadership, Team Collaboration

Work Experience

Hewlett Packard Enterprise (HPE), CPP3 Intern — 02/2026 – 07/2026, Remote

- Configured and deployed a **QEMU-based emulation environment** on **Ubuntu** to validate **Compute Express Link (CXL)** specifications without requiring physical hardware.
- Architected custom **Shell scripts** to automate the **system configuration**, **kernel compilation pipeline**, and QEMU environment setup, reducing manual overhead.

Regex Software Services, MERN Stack Intern (45 Days) — 06/2025 – 08/2025, Jaipur, Rajasthan

- Engineered responsive and interactive user interfaces using **HTML, CSS, JavaScript, and React**.
- Built and expanded **server-side applications** using **Node.js** while managing data modeling and operations with **Firebase**.

Projects

CXL Enablement with QEMU-based Emulation

- Built a QEMU-based virtualized CXL testbed to emulate Compute Express Link (CXL) devices for system-level validation.
- Configured and tested experimental Linux kernel drivers without requiring physical CXL hardware.
- Automated debugging and feature verification workflows using Linux and Shell scripting.

Numerate OS — Data Analytics Platform

- Built a full-stack analytics platform using React and Python.
- Developed REST APIs and user authentication for analytics workflows.
- Queried uploaded datasets to generate on-demand insights and validated APIs with Postman.

Rockfall Prediction (AIML)

- Developed an AI-driven rockfall prediction model using machine learning techniques and geological datasets.
- Performed data preprocessing and model optimization to improve high-risk event prediction accuracy.
- Enabled proactive safety and infrastructure protection through predictive analytics.

Education

Bachelor of Technology in Information Technology, — 2023 – 2027, Jaipur, Rajasthan
Jaipur Engineering College And Research Centre | Current CGPA: 9.29

Board of Senior Secondary Education, Rajasthan, — Bharatpur, Rajasthan
Vivekanand Public Senior Secondary School | Percentage: 89.2

Certificates

Cloud Infrastructure AI Foundation Associate

Web-Based Technologies and Multimedia Applications

Advance Computer Networks

Fundamentals of Investment
